

Review of the Portsmouth market, for the week ending July 8, 1850.

**GENERAL REMARKS.**—Business has continued exceedingly dull during the past week, and the transactions reported are limited. Harvest has fairly commenced, and our country trade will be small for three or four weeks. We have the most favorable reports relating to the wheat crop, and are satisfied that in this section the yield will be good. Corn is improving by late rains. The weather has been very hot, Friday and Saturday, the thermometer stood at 92 and 86, Fahrenheit.

River has risen gradually for last three days, but is now falling.

We note the following transactions of our market:

**FLOUR AND GRAIN.**—Prices have continued exceedingly depressed for flour. \$4.60 is the quotation for lots, with light sales. The stock in hands is light, and purchasers are only buying for immediate wants. The shipments to Furnaces have been also small. It may be quoted at \$4.75 retail. No transactions in wheat are reported. Sales of oats from wagon at 30c. Sales of corn at 50c.

**SUGAR AND MOLASSES.**—Holders of these staples continue firm in their quotations. Fair Sugar brings 64 by hhd. We quote 64 to 7 as the extremes by bbl. Molasses is offered at Cincinnati rates, 33c per bbl in lots. S. H. Molasses 38 to 40.

**COFFEE.**—The firmness noted last week still continues, prime coffee is held at 11c for single sack, 104 in lots.

**CHEESE.**—Large arrivals have depressed the rates current last week for cheese. They are offered at 54 in lots of 5 and 10, and 6 to 64 by single cheese. We remark in passing that the sales and consumption of cheese is rapidly increasing in this market.

**SOAP AND CANDLES.**—We quote Summer Candles at 10 1/2c. Bar Soap 4 to 4 1/2 in quality. Star Candles 24c by box.

**BROOMS.**—Prices unchanged. \$1.50 to 2.25 per dozen.

**PROVISIONS.**—Barrel Pork is held at \$9.50 per bbl, small stock in first hands. Bacon shoulders 43. Sides 64 by cask. Lard 61c.

**WHISKY.**—Sales at 21 and 22, and market closes firm, though the shipments have not been large for the week.

**FAMILY MARKETING.**—Our housekeeping readers will have noticed the improvement in offerings at our market. Choice beef and mutton are eagerly inquired for. Fresh fish are dull. New potatoes and other garden vegetables are now abundant. Chickens, butter and eggs, are more scarce.

**Cincinnati Market.**

**Flour and Grain.**—Sales of 100 bbls extra from store in two lots, at \$4.75; shipping brands quoted at \$4.25. Ordinary descriptions are offered at \$4.10 and 4.15. Nothing doing in grain.

**Provisions.**—Business dull, and we have only small sales. Sales this morning of 240 pieces yellow washed canvassed hams, at 74c loose.

**Whisky.**—Market continues dull, prices unsettled. Sales at 22 1/2 to 23 1/2, these prices above the views of buyers.

**Groceries.**—Market continues quiet, prices unchanged, and holders are firm for Coffee, Sugar and Molasses.

**Cheese.**—The demand is moderate. Sale of 30 boxes prime at 6c.

**Tobacco.**—A sale of 40 boxes Va. No. 3, pounds, at 18c.

The Scotch laws prohibit the running of public vehicles upon the Sabbath—such as railway trains, stage coaches, omnibuses and steamers.

**DR. S. D. HOWE'S**  
**Shaker Sarsaparilla.**  
In Quart Bottles.

AN efficient and certain remedy for the cure of Jaundice, Palpitation of the heart, Impurity of the blood, Scrofula, cutaneous eruptions, Langor, phlegm and poisons on the face, sick headache, habitual constipation, loss of appetite, dyspepsia, chronic rheumatism, syphiloid diseases, debilitated stomach, depression of spirits, old sores, and diseases of the blood and indolence of Mercury.

A signal cure of an obstinate case of Tetor of 14 years standing, by the use of Dr. Howe's Sarsaparilla.

**CINCINNATI, March 15.**  
Dr. Howe—Dear Sir: Having witnessed the controlling influence of your preparation of Shaker Sarsaparilla over disease, which often baffles the skill of the best physicians, it is my duty to you and to the afflicted to make this statement.

My wife has been afflicted with tetor (which is one of the greatest scourges to the human race), for the last 14 years, during which time I have consulted and employed a number of the most eminent physicians in the country, and with but little success. I was at last persuaded to try your preparation of Shaker Sarsaparilla, though I had but little confidence that it would effect a cure. But I was happily disappointed for she had not used more than one bottle until the happiest results were produced, and after using two, the disease entirely disappeared. I have not the least doubt but that the most obstinate case of Tetor can be cured.

Those that are afflicted and who wish for further particulars, will please enquire of Dr. J. P. Jodkins, who was our attending physician, or call upon me on Barr street, between Linn and Cutter, Cincinnati.

**To School Examiners and Directors.**

THAT it is desirable and highly important that uniformity should be observed in the use of school books, all teachers and parents will testify. And in order to promote this object, we propose introducing in all the public and private schools in this region, the

**Eclectic Educational Series,**  
comprising a primer, speller, six readers, three arithmetic and keys, and two Algebras, also Pinno's 1st and 2d part grammars. After a lapse of several years, during which the books have been thoroughly and practically tested, they have gone through a careful and entire revision, embodying as far as possible all that experience could suggest, or talent accomplish.

They are now presented to the public, based on the following considerations: 1st. They are better than any other now in use. 2d. They are cheaper than any others. 3rd. They are entirely a western book. For the benefit of those who have not had an opportunity of examining these books, we would say, that a pamphlet containing a minute analysis of all their leading characteristics, with certificates and opinions of teachers and others throughout the United States, may be had on application at our store. And any persons wishing to examine the books, will be furnished with a set of the series by sending their address.

In order to facilitate this arrangement, we propose to take the old books for the purpose of introduction at half price, thereby obviating the great objection that has heretofore been made to these changes by the increased expense which under any other arrangements must be necessarily incurred.

**Brandeth's Pills.**  
Among the many evidences, of a character undoubted, some of which have been made public, showing the wonderful efficacy of my pills in cholera, the following is worthy of the serious consideration of all who yet remain sceptical. I am confident that if the pills are taken in the early stage of the disease, or what is better, if the bowels are thoroughly evacuated by them repeatedly during the prevalence of the predisposing cause of cholera among us, that but few cases would occur, and of those that did not one per cent. would die.

**B. BRANDETH.**  
**Cholera.**  
IMPORTANT CORRESPONDENCE OF THE NEW YORK SUN.

Dreadful ravages of the cholera among overland Emigrants to California.—Suffering and sickness.—Brandeth's Pills in cholera.—Return of Emigrants to St. Louis.

St. Louis June 6th, 1849.

Messrs. BEACH: I left New York city on the 15th March last, as one of a company of forty eight persons, to rendezvous at Independence, Mo. and proceeded thence to California. We were fortunate in making our arrangements at Independence, and left there in good health and spirits on the 19th April. Two other companies, one from N. Hampshire and the other from Western New York, left at the same time, we journeyed on in company for the first six days; after that we left them behind, as they had no teams, which are bad travelers.

The second week out we were alarmed at the appearance of the cholera, as one of our number was suddenly taken with vomiting, &c., &c., and such was the absence of mind: or, I might, that before anything was done for him he was in convulsions, and died in a few hours after the first attack. The next day another was taken and one of our number, had laid in some of Brandeth's Pills on speculation, gave the patient a dose of nine pills, and in thirty minutes after five more, and he was saved.

By this time the two other companies came up and joined us, and now the cholera made its appearance in earnest. The first day there were five taken, the next seven, and the third thirteen, and soon we had a hospital in the wilderness, and our only physician a cabinet-maker with Brandeth's Pills; and strange as it may appear, we only lost two others beside the first one taken and they took no less than 33 of Brandeth's Pills, I concluded to return home and two more of our company sold out their pills and we retraced our steps to this place, companies that passed us lost many of their numbers especially where spirits and brandy were used and laudanum administered. All our men took was pills and some crust tea. I saw no less than 9 of a company buried in one grave. The suffering of the men on the plains is awful.

Since I have been here, 8 more of our company have returned here, and among them Savary who had the pills. He sold out his pills to other companies at \$1 per box; we need not lose anything after all. We need not that our entire company will be here this week as we have had enough of California and Brandeth's pills to last us for a quarter of a century at least.

Yours truly,  
**PHILIP D. SCHAEFF.**

[As the above letter comes to us with a genuine note attached to it, and as the writer is known to us as a gentleman, formerly a resident of New York, we would be acting unjustly did we deny its publication. This, however, we would have done had the letter not come, as it did, directly to ourselves as a matter of simple correspondence from a source we could not expect of any sinister motive. We would, in ordinary circumstances, be slow to publish correspondence containing either to the injury or aggrandizement of any party. Dr. Brandeth's pills are well known as a most excellent medicine but we must confess that we have hitherto been rather incredulous as to the propriety of their use in cases of cholera. But this letter speaks for itself, and we publish it as a matter of duty, and without Dr. Brandeth being aware of its existence.—Eve Sp.]
